or Outside Earth.

There are a number of believers in the theory that we are living in the earth instead of outside. The uppleasant people want us to admit that we are surrounded by a shell like a huge nut. Just what good it will de us to admit this isn't clear. About th mly benefit to be derived from the it formation, as far as we present is the possibility that the conists may precare themselves fo a hard bump against the inner side of the shell if they ever go up to high

We are also told that the acceptation of this kernel in the nut the will explain many things which we remember

It will also upset a great many things with which we are famillar and which on the whole, we like pretty

This leads us to remark that we pro fer to believe we are outs. At the same time if the inside facts are convincing we are open to conviction .-Cleveland Plain Dealer.

At this the senator merel growled and would have escaped into less rarified atmosphere had not another of his confreres approached him and said: "Well even if he is a duke, Senator. Le appears to be quite a nice man. I suppose Prince Helie de Sagan and the other noblemen now American will leave cards."

Uncle Joe Cannon came along ust then, and, stopping Mr. El kins, asked him if he had made ap his mind yet what he weuld do with his crown. "Your wife might use it," he suggested, "ss a fruit dish; or, if you liked, you might stand it up on its points and make a tabourette out of it. Well. at any rate," he added, with chuckle. "a crown on the head worth two on the tooth ."

By this time, however, Senator Elkins was in no convival mood So I did not remain with him any longer, believing it to be unsafe. I should not be surprised if there would be a physical encounter in the Senate some day like the re cent Williams d'Armond affair. but thus far Mr. Elkins has shown much restraint.
